Software specifications

Chapter number	Software required (With version)	Free/Proprietary	If proprietary, can code testing be performed using a trial version	If proprietary, then cost of the software	Download links to the software	**Hardware specifications**	OS required
All	Python 2.7	Free	-	-	https://www.python.org/downloads/	Any normal machine	Windows/ Linux

Detailed installation steps (software-wise)

The steps should be listed in a way that it prepares the system environment to be able to test the codes of the book.

- The examples would be much easier if you use IPython Notebook. This comes with Anaconda distribution which can be installed from here https://www.continuum.io/downloads
- The Python packages which are used widely for example. pandas, matplotlib, scikit-learn, numpy and so on should be installed. If you install Anaconda, these packages would come pre-installed
